Who are we now?

✓ **Expertise**
Custom software development, Processes, Product research and development.

✓ **Partnership network**
From custom development IT insourcing and outsourcing to product development partners, universities, tech. and business partners.

✓ **Internal processes**
We improve daily, but the most significant processes like sales, HR, product development are now clear and understandable.

✓ **Investment**
Firstly we invest in employees. Reason? That they become consultants. We invest in products to diversify revenue and profit streams.

EASYFLOW

SUNRISE VALLEY DIH SERVICES

The project is partially financed by the funds of the European regional development funds according to the "Skaitmeniniai inovacijų centrai" call no. 01.2.1-LVPA-K-857-01.

SSSIC can offer a total of over 40 innovation support and digital innovation services. Companies that have used SVDIH services will have the opportunity to recover up to 50% of their funds using de-minimis state aid.

Sunrise Valley Science and Technology Park has formed an group of innovation providers, and together with nine organizations have started implementing the project "Development of activities and services of Sunrise Valley Digital Innovation Hub". The project aims to achieve the following goals:

- To create awareness about digitalisation benefits and implementation possibilities.
- Increase the competence and infrastructure capacity.
- Expand collaboration relations.
